PROFILE

Passionate Frontend Developer skilled in building responsive and user-friendly web applications. Experienced in creating clean, efficient, and scalable interfaces using modern technologies. Focused on delivering seamless user experiences while continuously expanding my skills toward full-stack development.

EDUCATION

Karimganj Sobhania Kamil Madrasha ***Kishoreganj, Dhaka***

Fazil (Bachelor Equivalent) in Islamic Studies 2026–Present

SKILLS

Technical: HTML5, CSS3, JavaScript (ES6+), React, Nodejs, Tailwind CSS, daisy UI

Tools: Git, GitHub, Firebase

PROJECTS

Law.Bd | Live link GitHub Repository

- Developed a responsive lawyer appointment booking web application using **React**, allowing users to browse lawyer profiles, view details, and schedule consultations based on availability.
- Implemented **client-side routing with React Router** to navigate between pages such as lawyer details and booking management.
- Built appointment booking and cancellation functionality with **local Storage** to persist user booking data and dynamically display booked appointments.

Boi Poka | Live link GitHub Repository

- Built a **React-based book tracking web application** where users can browse books, view detailed information, and manage reading preferences.
- Implemented **Read List and Wishlist functionality** with data persistence using **Local Storage**.
- Developed **dynamic routing with React Router** and added **sorting features by rating and total pages** with a responsive UI using **Tailwind CSS**.

BPL Dream 11 | Live link GitHub Repository

- Developed a coin-based player selection system where users can claim coins and purchase players according to their individual price and available balance.
- Implemented balance validation logic to prevent purchases when the coin balance is insufficient.
- Built a responsive interface using **React and Tailwind CSS** with dynamic state updates to provide real-time user feedback.
